SUMMARY

Fullstack Developer with 1 year of experience in building SEO-focused Next.js applications, admin systems, analytics pipelines, and scalable backend services. Strong expertise across modern state management patterns, end-to-end data validation, automated CI/CD pipelines, and self-managed cloud deployments.

EXPERIENCE

Fullstack Developer

A-connection Group

Apr 2026 – Present

Ho Chi Minh, Vietnam

- Rebuilt a **10+** year legacy PHP website as the sole developer into a modern commercial property marketplace, architecting a multi-app system with Next.js SSR, NestJS API, Refine CMS, and a shared **@contracts** package.
- Achieved near-perfect Google Lighthouse scores (**99** Performance, **100** SEO) by migrating to Next.js SSR and integrating Cloudinary CDN, completely eliminating image load latencies.
- Drove an **88%** boost in web traffic within the first **30** days of deployment, increasing monthly pageviews from **5,000+** to **10,000+** due to optimized server-side rendering, **Zustand**, and **TanStack Query** state management.
- Engineered a brand-new production database from scratch, successfully capturing **1,300+** property listings, **200+** tenant requests, and active user registrations within **1** month post-launch while ensuring strict data validation via **Zod**.
- Implemented core marketplace workflows for listing moderation, tenant-landlord matching, live search, Excel exports, and an operations dashboard integrating both GA4/GTM analytics and internal DB tracking.
- Deployed Dockerized services across dev/staging/production on a self-managed VPS using GitHub Actions, GHCR, and Coolify, implementing daily automated DB backups and health checks.

Fullstack Developer

EnjoySport

May 2025 – Feb 2026

Ho Chi Minh, Vietnam

- Developed and maintained high-traffic Next.js SSR products for sports content, live events, and internal operations, leveraging **Redux Toolkit** and **RTK Query** for global state and data synchronization.
- Built SEO-optimized pages and map-based visualizations for nationwide events and race timelines.
- Improved livestream admin systems by enhancing UI/UX, integrating real-time data services, and implementing GA4 tracking.
- Developed a high-concurrency Zalo Mini App for Amazfit photobooth at Techcombank HCMC International Marathon **2025** (**23,000+** participants), ensuring instant, zero-downtime photo access during peak finishes.
- Independently built a fullstack athlete ranking platform handling **500,000+** records and **15,000+** athlete profiles with NestJS, custom data crawling and normalization pipelines, **Redis** caching, and admin tools.

PROJECTS

ParaVibe | *Next.js, NestJS, FastAPI, Python, MySQL, Docker, MERT, SBERT*

Nov 2025 – Feb 2026

- Fullstack music streaming platform with AI-based recommendation using MERT/SBERT audio and metadata embeddings for real-time similarity search.

Riot Games Platform Recreation | *TypeScript, Next.js, NestJS, RTK Query, PostgreSQL*

Oct 2024 – May 2025

- Fullstack web application recreating a multi-game publishing platform with responsive pages and backend-managed content.

E-Learning Prep Platform | *Next.js, Node.js, Express.js, MongoDB, Clerk, ZaloPay*

Jun 2024 – Sep 2024

- Web-based language learning platform with personalized flows, content management, authentication, and Zalo payment integration.

TECHNICAL SKILLS

Frontend: TypeScript, React, Next.js (SSR/SSG), Tailwind CSS, Shadcn, Ant Design

State & Data Management: Redux Toolkit, RTK Query, TanStack Query, Zustand, Zod, RESTful APIs, Swagger

Backend: Node.js, NestJS, Python, Prisma ORM

Databases: MySQL, PostgreSQL, MongoDB

DevOps & Cloud: Git, Docker, GitHub Actions, GitLab CI/CD, ArgoCD, Coolify, GHCR

Testing & Tools: Jest, Playwright, Postman, Figma, Jira, Agile/Scrum, GA4/GTM

EDUCATION

University of Information Technology

Information Technology (Top-up Program)

Ho Chi Minh, Vietnam

Oct 2024 – Present
